EXPERIENCES

Internship At CYRILLE PRO REPAIR, YAOUNDE

June 2013 (03 months)

During this period I learned a lot about **electronics**, **infographic**, **installation of operating systems** and **many other things** . It was my first real immersion in the tech world.

Working while learning At AfroVision, Buea

Since December 2019 till now

AfroVision is a Cameroonian based firm whose main business is to introduce Africans to computer systems. I learned here **Java play Framework**, **asynchronous programming (AKA)**, **C# programming** and **bootstrap** aside with them.

Freelance work

Since December 2019 till now

I am solving local problems through freelancing. I am realising websites (ecommerce platforms like light design), platforms, facebook business pages (shopping store) .

Community work

Since December 2020

I have a youtube channel (29minutes de scientisme) for helping youth to prepare their official exams (Baccalaureat). Me and my team make content about **mathematics**, **physics** and **computer science**.

Classe Scientifique CEO

Since September 2020

Classe Scientifique is a small company that offers additional home lessons for certain students whose parents are interested and able to pay. Our role is to supervise, look for lecturers and connect them with parents. That is our web page to contact us (mon-site).

Internship At ICCSOFT SA, Yaounde

September 2020 - February 2021 (06 months)

ICCSOFT is a company specializing in the publishing of Software, websites and applications. I worked on so many projects (*implementation of school management platform, automated attendance, archiving...*) and learned a lot. I polished my skill on **django(python)** and **angular** even though I dealt also with **Java FX**, **Odoo(ERP)** and other technologies.
